***Only available for Android** 

INSTALLATION TURBO ENERGY APP - DUAL

WiFi Configuration

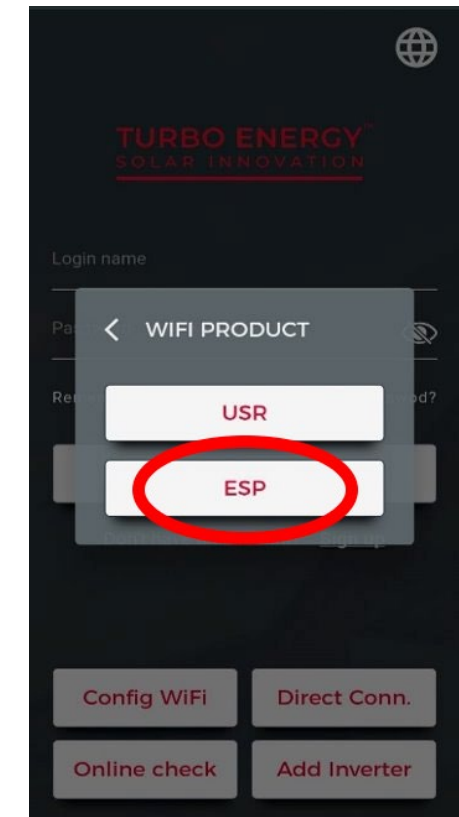

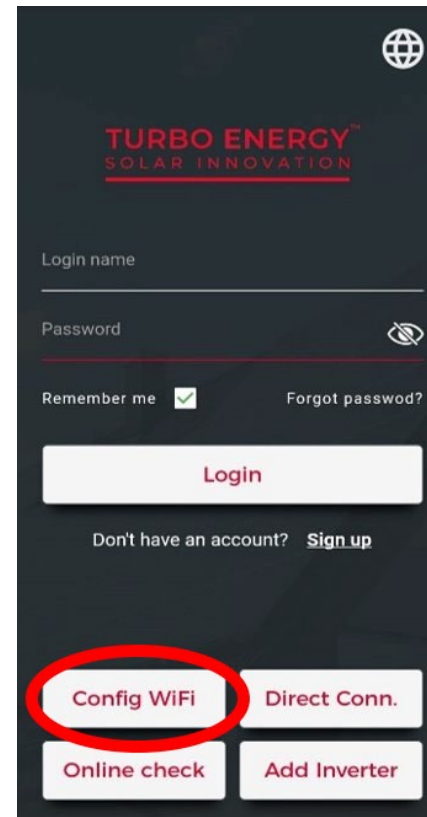

To configure the WiFi connection, do the following.:

1. Connect your phone to the WiFi network to which you want to connect the battery
2. Press and hold the battery **RESET** button for 2 seconds

3. Open the APP and press WiFi
CONFIG.

Then press **ESP**

*Only available for Android 

WIFI CONFIGURATION

4. Check if the SSID matches your WiFi and enter the password.

Press **BROADCAST** and then press **START SMART CONFIG**

Once configured, the battery LED will stop flashing and the APP will indicate that the configuration has been completed.

The screenshot shows the 'CONFIG WIFI-ESP' interface. It features a dark background with white text. At the top left is a back arrow. The fields are: 'SSID:' with a refresh icon, 'BSSID:' with a refresh icon, 'Password:' with a refresh icon, 'Pack Count:' with the value '1', and two radio button options: 'Broadcast' (checked) and 'Multicast' (unchecked). At the bottom is a white button with the text 'Start Smart Config'.
